

# CIVA Catalogue Committee Report 2017

## Agenda Item 10.

Among the proposals to the CIVA Plenary for 2018 there was one concerning the Aresti Catalogue.

### NP 2018-4

Source: Norway #1

Document: Aresti Catalogue; Power and Glider Versions

Subject: Optional roll elements in P-Loops

### Proposal

Add optional roll elements on vertical up/down lines and where applicable on horizontal entry/exit lines of figures 8.6.17 through 8.6.24 (P-Loops with half rolls in the apex).

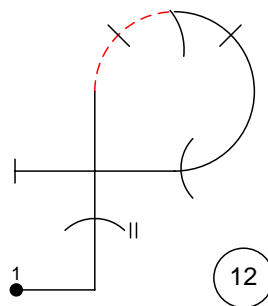

### Comment

When these figures were introduced several years ago, the optional roll symbols on the horizontal entry/exit lines and on the vertical up/down lines as in families 8.6.1 through 8.6.8 were omitted. The proposal calls for adding the optional roll symbols in order to improve the versatility of this figure family.

The Catalogue Committee agrees with this proposal and recommends its adoption.

### Sample figure

8.6.19.1
